OBJECTIVE

Aspiring Computer Science and Data Science student seeking opportunities to apply skills in machine learning, intelligent systems, and software development to real-world challenges. Committed to leveraging strong problem-solving abilities, hands-on project experience, and a passion for innovation to contribute to impactful, technology-driven solutions while continuously expanding expertise in AI and scalable system design.

EDUCATION

CMR Institute of Technology Expected 2028
Bachelor of Engineering GPA: 7.6/10.0

EXPERIENCE

Quality Check Intern July 2025 – September 2025
Incanus Technologies Pvt. Ltd. (Newton School) Bangalore, India

- Completed a 2.5-month internship at Incanus Technologies Pvt. Ltd. (Newton School), demonstrating responsibility, sincerity, and eagerness to take on new challenges.
- Actively and thoroughly involved in assigned quality check responsibilities, contributing to internal process improvements.
- Demonstrated strong work ethic and professional conduct, earning recognition from leadership for willingness to learn and adapt.

PROJECTS

Samridh – Next-Generation Fighter Pilot Helmet

- Designed a high-precision AI-powered helmet for fighter pilots enabling 360° battlefield awareness.
- Authored 3 research papers and drafted a patent.
- Awarded 15 Lakh MSME grant under Ministry of Defence.
- Technologies:** PyTorch, Pandas, Scikit-Learn, TensorFlow, CNNs, n8n
- Note: Link cannot be provided due to privacy policy.*

BioRythm: New Gen ECG Device

- Developed end-to-end hardware-to-cloud ECG monitoring system with custom AI model analyzing 6 cardiovascular parameters, achieving 95%+ accuracy in anomaly detection.
- Led research efforts authoring 3 research papers and drafting 3 patents for novel ECG analysis methodologies.
- Selected to showcase at SRISHTI 2025, Karnataka's premier project expo, demonstrating technical innovation.
- Technologies:** PyTorch, MERN Stack, CNN, TensorFlow, Detectron2, Ollama, Arduino IDE, PowerBI

NeuroSystem – EEG-Based Thought-to-Target AI System

- Built an EEG-based AI system for fighter pilots enabling enemy target lock-in within fractions of seconds using neural signal processing.
- Designed custom ML pipelines for neural signal classification.
- Won 1st Prize at AI Cohort 2025, Selected for APF 2025, received 50,000 INR in funding, published a Research Paper and filed a Patent.
- Technologies:** Pandas, Scikit-Learn, PyTorch, CNNs, MERN Stack, Flask, Embedded AI
- Note: Link cannot be provided due to privacy policy.*

TECHNICAL SKILLS

Languages & Frameworks: Python, C++, C, MySQL, MongoDB, Scala, Java

Developer Tools: Git, GitHub, Jupyter Notebook, VS Code, Android Studio, PowerBI

AI/ML: PyTorch, TensorFlow, CNN, LSTM, Llama2, Generative AI (LLMs)

Domains: PyTorch, Pandas, Scikit-Learn, EEG/ECG Signal Processing, Embedded ML

Soft Skills: Active Listening, Empathy, Verbal/Non-Verbal Communication, Group Discussion

AWARDS & RECOGNITION

Winner, MSME 4.0 Idea Hackathon (15 Lakh Prize)

- Won the MSME 4.0 Idea Hackathon, securing a prize of 15 Lakhs for an innovative business idea.

1st & 3rd Place, AI Cohort 2025

- Secured dual top-three positions in AI Cohort 2025, demonstrating consistent excellence in AI-focused challenges.

Finalist, Manthan 2025

- Selected as a finalist at Manthan 2025, recognized for innovative problem-solving and ideation.

Finalist, APF 2025

- Shortlisted as a finalist at APF 2025 among top competing teams nationwide.

Finalist, Vishwakarma Awards 2025

- Recognized as a finalist at the Vishwakarma Awards 2025 for outstanding innovation and technical contribution.

Selected, Bharat Innovates 2026

- Selected to represent and showcase innovation at Bharat Innovates 2026, a national-level innovation platform.

Top Positions, SRISHTI, SIH, Vyhatech & IEEE Rapid Innovation Challenge

- Achieved top positions across multiple prestigious competitions including SRISHTI, Smart India Hackathon (SIH), Vyhatech, and IEEE Rapid Innovation Challenge.
